

BREAKING NEWS!

INTRODUCING THE

iTeraCare Wand!

How it Works

Radiant Heat

Current is passed through a coiled, Nichrome element, creating both radiant and infrared heat.

Optical Quartz

As infrared waves pass through the optical grade, quartz tube, excited electrons begin to vibrate.

TeraHertz Technology

Significantly void of impurities, the optical quartz tubes vibration generates TeraHertz frequencies.

Convection Current

As TeraHertz frequencies are generated, convection currents force the radiant air from the fused, quartz tube.

Transdermal Delivery

When the wand is pointed towards the body, non-ionizing frequencies are delivered directly through the skin.

"Future medicine will be the medicine of frequencies"

Albert Einstein

What is Terahertz?

Terahertz wave frequency is found between far infrared and microwave, with a wavelength of between 0.3 um and 3 um.

When cells are irradiated by Terahertz frequency, it rapidly transfers energy into the human body and activates inert cells. Scientific research shows that it is **completely safe** for the human body's cells absorption. The principle treatment of iTeraCare is to unclog capillaries to enhance the body and cells to function healthily.

iTeraCare uses Terahertz technology, an electromagnetic wave that can penetrate up to 20-30 cm into the body, reaching the bone marrow, improving

blood circulation and strengthening our immune system.

Terahertz resonates at the same frequency as normal human cells, generating hundreds of millions of vibrations per second.

The iTeraCare Device integrates three top technologies - Terahertz, Quantum and Optical Quartz. Its components are cast with more than 100 trace elements.

The **iTeraCare Device** is stringently tested, inspected and certified by the China Beijing Academy of Sciences, the National Intellectual Property Rights and Patent Certification as well as other authoritative organizations' certifications. It is a combination of Chinese and Western Cytology Technology.

iTeraCare Classic Wand
Just \$380.00!

Before and After
2 year old dog w/
cancerous growth on lip
after wandung for 2-3 wks.

Notice the dark
spot on dogs back
from a skin
infection. Vet said
it was permanent.
After a few months
of 'wandung' a few
minuter per day the
spot is GONE!

Day 7 on antibiotics
necrosis continues

This shows a large piece
of the nose has been
eaten away ! This is the
first day we wandung

4 days after wandung

Day 6 of wandung !
Pretty impressive seeing
as skin takes 30 days to
turn over

One week Monday

This is a 'Nose ring Gone BAD!'
From possible amputation to almost healed after one week of 'wandung'!

Psoriasis after roughly one
month of 'wandung'!

M.D. said leg on left would never get better.
Right - after about a week of 'wandung'!

Varicose veins
before therapy with
iTeracare device.

Varicose veins After
one month therapy
with iTeracare
device.

Plants love it too!
