iTera - Bio

Clears blockages,
enhances circulation from inside out.

Experience the resonance effects of Terahertz waves, Bio Sinusoidal energy and human cells all at the same frequency.

Triple Energy for Better Effect

Energy 1

The spectral imaging effect of **Terahertz waves** can accurately detect cell abnormalities in human cells.

Energy 2

The **Bio Sinusoidal energy** resonates with human cells at the same frequency to activate cells and provide energy.

Energy 3

Graphene far-infrared ray rapidly increases the temperature of the skin surface, accelerates blood circulation, relieves muscle tension and relieves pain.

Improves circulation
Stimulates cellular immunity
