

TERA-P90

SMART FREQUENCY DEVICE

HARNESSING THE POWER OF THE 5TH ELEMENT

Life on Earth appeared when the geomagnetic field was formed and increased to a certain strength. The huge magnetosphere created by Earth's magnetic field on its surface forms a natural protective barrier against the invasion of the outside world. Only living within a normal geomagnetic field can guarantee the health and continuity of life. Therefore, just like sunlight, air, water, and nutrition, geomagnetism represents the fifth essential element for life to survive.

HOW DOES TERA-P90 WORK?

The Olylife Terahertz P90 features a lightweight and elegant design. It harnesses the concept of terahertz wave resonance and PEMF frequency, aligning their frequency with that of human cells to emit highly precise terahertz waves ranging from 8 to 1000 micrometers. Essentially, this device functions as a 'cell charger' for the human body, effectively replenishing bioenergy.

FUNCTIONS
