

5 Advantages, Enjoyable Experience

Small & Lightweight:

Easy to operate & carry, charge your cells anytime anywhere

Integrated Design:

Brushless Blower, 12000RPM, no mechanical noise, fast heat transfer, basically no temperature rise on the surface of the instrument.

Intelligent Control:

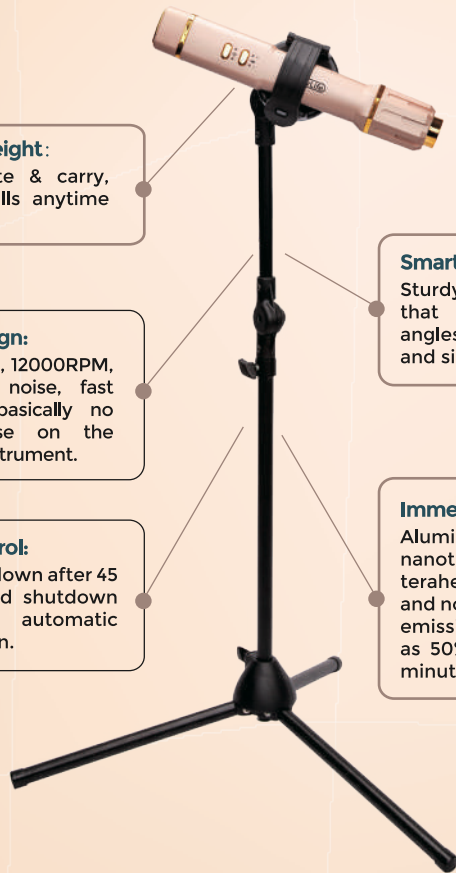

Automatic shutdown after 45 minutes, delayed shutdown function, and automatic cleaning function.

Smart Bracket:

Sturdy and patented model that switch between 4 angles to meet various lying and sitting therapy positions.

Immediate Result:

Aluminum oxide graphene nanotubes are used to emit terahertz wave, it is durable and non-destructive, and the emission content is as high as 50%. Soothe pain in 15 minutes.

Hello Scientific Wellness,
Goodbye Sub-Health

Are You Truly Healthy?

Some people say that if you are not sick, you are healthy. In fact, this is not the case. We all know that cells are the basic unit of the human body, when problems occur in some cells, the human body does not have any symptoms and even modern medical methods cannot detect them. Only when a large number of cells are seriously affected and disabling self-repair, thus the disease will manifest and cause the symptoms to be prominent.

Modern medicine believes that human beings have only one disease - cell disease!

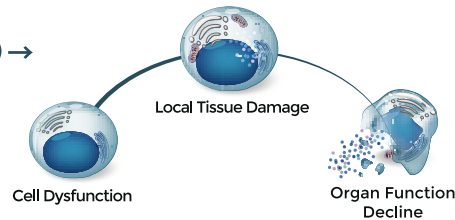

Olylife THz Cell Essentialz
Scientific Wellness, Safeguard Your Health

The 3 Stages Of Disease Development

- 1、Cell Dysfunction (sub-health) →
- 2、Local Tissue Damage (ulcer, inflammation) →
- 3、Organ Function Decline (diabetes, uremia, hypertension, heart disease, etc.) →

True health is a state of the body in which all cells are functioning optimally.
Therefore, cellular health = human health

Who Stole Your Health?

Air Pollution

Global Warming

Reduction Of
Geomagnetism

The Stress In Life

Bad Habits

Smoking And
Drinking

Nightlife

Overeating

Irregular Meals

Our health has been seriously overdrawn! Are you experiencing:

Weak body, bad mood, fatigue, insomnia, skin problems, blocked meridians, numbness of limbs, sore shoulders and neck, joint pain.....

THz Cell Essentialz – Nurturing Cell with Technology

In the 1980s, American scientists discovered a kind of light with the same vibration frequency as normal cells—terahertz waves. It has high frequency, short pulse, and strong penetrability. It can penetrate 20-30 cm into the human body, strengthen and activate cells, and stimulate the inherent ability of cell repair and regeneration, thereby improving the body's self-healing function. It is known as the light of life.

Functioning Theory:

Frequency

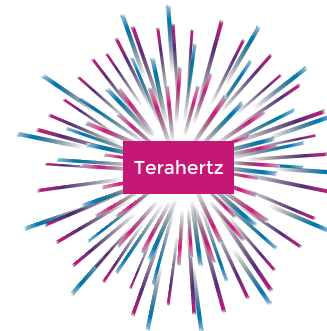

Using the resonance mechanism of terahertz waves and human cells at the same frequency, terahertz waves will pass through normal cells at a constant temperature, and cells will revive by absorbing the energy of terahertz waves. While on the blocked or abnormal cell parts, it will heat up gradually and after several treatments, the stasis will dissipate steadily.

Band Wave

The wavelength band of terahertz waves is between far infrared rays and microwaves, and the wavelength is between 3-1000 microns, which is only one-thousandth of mobile phone radiation and one-fortieth of sunlight radiation, which is very safe.

Strong Penetration

Massage by hand can penetrate 2-3 cm into the human body, massage by machine can penetrate 6-7 cm, while THz cell Essentialz can penetrate up to 20-30 cm. It quickly dredges meridians and lymph, expel cold and dampness, and improve the microcirculation of cells. It solves the problem of traditional heat therapy and moxibustion where it is difficult to penetrate deep into the body. It is able to supply and repair the Qi in a large range.
